**(866) 610-8890**

The Comfort Master APU provides 33,000 BTU's of Heating and Air Conditioning at 650 cfm. The Comfort Master APU is assembled in America by Americans with mostly American parts.

### **Comfort Master Pro 1 provides all of the following features standard:**

- 33,000 BTU's of Heating and Cooling
- 650 cfm blower unit to push out all that hot and cool air in a hurry
- Auto-start battery protection
- Winter mode – automatically detects extreme cold conditions and prevents specific APU components from freezing, extends glow plug timing
- 120 Amp Alternator
- Exclusive in-cab, state of the art, digital controller for real time APU stats, starting and stopping, programmable thermostat, scheduled maintenance notifications and warning messages.
- Stand-alone system. It connects only to the truck's fuel and battery source. The radiator and condenser are incorporated into the unit.
- Electric fan for faster warm-up and cooling.
- 3 Cylinder Isuzu diesel engine with an average life of 25,000 hours
- Optional Power Pack to provide 1,800 Watts of 120 Volt (AKA 110) with 4 electrical outlets.
- Optional Cold Weather Pack to keep your truck and your APUs engine warm in winter.
- 3 Year 3,000 hours Isuzu Manufacturers limited warranty
- 2 Year 4,000 hour limited warranty on all other components

### **Measurements:**

- Super quiet 59 dB at 21 ft under full load - outside the cab
- Dimensions are 24" W x 29" H x 24" D off the railing of the truck
- Weight is 400 LBS, total base APU installed
- Average fuel consumption is .22 gallons per hour at full load
- Installation time is an average of 6-10 hours
